The Inca remote controlled Flat Screen TV Swivel P/N 900803-4 is a self-contained machine driven by a synchronous motor. It is configured to run in any direction as required. The controller provided is a single channel RF transmitter/receiver. However, touch screen compatible controllers are also readily available. The base assembly is fabricated from 12-g stainless steel for long life. The swivel ring is 8.50” in diameter and 1.25” in height. This unit can carry up to 200 lbs. Ports are provided to allow easy access of cables from the flat screen TV. The magnetic left and right default cams can be easily accessed from the outside of the swivel ring. A multi-pin aircraft connector, on a cable, is mounted on the swivel base. The external J-box is configured for easy attachment of switches, remotes, and other controllers. The synchronous drive motor extends below the mounting plate by 2.50”. A cable clamp on the center is provided, to keep the TV and power cables properly located.
